Full-Stack Developer & AI Architect

EXECUTIVE PROFILE

Software Engineer with expertise in AI agentic systems and scalable full-stack architectures. Proven track record in shipping MVP features for energy platforms and automating complex outreach workflows. Certified in LangChain and LangGraph, with a focus on building local-first tools and high-velocity prototyping in early-stage environments.

EXPERIENCE

Co-founder | Lock N Key
January 2025 - Present · Karachi, Pakistan · Locker rental startup operating at IBA Karachi, focused on digitizing student storage solutions.

• Built a custom Next.js/Supabase platform and automated email pipelines via Resend, achieving a 62.5% occupancy rate during launch phase.

Software Engineer Intern | InfiBrain Technologies LLP
June 2026 - September 2026 · Remote · Foundational engineer for InfiEnergy, an energy-focused web platform built with Next.js and Supabase.

• Shipped 20+ full-stack features using Next.js and Supabase, authoring custom RPCs to ensure data integrity for the platform's MVP launch.

Coordination Intern | IBA Centre for Entrepreneurial Development
June 2026 - August 2026 · Karachi, Pakistan · Program management and outreach for startup accelerator programs including SAP and i-Incubate.

• Developed Selenium and Google Apps Script automation tools, saving 10 hours/week by automating outreach to 20+ startups per campaign.

IT Networking Intern | Premier Sales Pvt. Ltd.
June 2025 - June 2025 · Karachi, Pakistan · Focused on cybersecurity and IT infrastructure modernization within the networking department.

• Analyzed network security and presented a strategic IT modernization roadmap to leadership to replace legacy systems.

EDUCATION

Institute of Business Administration (IBA), Karachi · Bachelor of Science in Computer Science

• Focus on AI agent development and scalable web architectures
• IBA CED initiative participant for startup operations

Cedar College · A-Levels

PROJECTS

OmniReach — Developer
Local-first desktop application for bulk email and WhatsApp campaigns with a hybrid architecture.

Technologies Used: Python, Tkinter, Local User Agent, AI-assisted Development

• Architected a local-first desktop tool using Python and local user agents to automate bulk outreach, bypassing server-side limitations.

Workout Tracker App — Developer
Offline-first mobile application featuring a custom synchronization engine.

Technologies Used: React, Supabase Auth, Supabase DB, Offline Sync

• Engineered a custom sync engine for an offline-first React app, ensuring data integrity between local storage and Supabase cloud data.

SKILLS & KEY STRENGTHS

Technical: TypeScript, Next.js, Supabase (PostgreSQL), AI Agent Development, Python, React, SQL, REST APIs, Selenium, LangChain, LangGraph, Git/GitHub

Interpersonal: Pragmatic Problem Solving, Rapid Prototyping, User-Centric Iteration, Solo-Founder Mindset, Cross-functional Coordination
